

What is non-invasive prenatal testing?

IONA[®] Care is a non-invasive prenatal test (NIPT) for pregnant women which estimates the risk of a fetus having Down's syndrome or some other serious genetic conditions.

IONA[®] Care is carried out on a small maternal blood sample. Pregnant women can expect their screening test results from their healthcare provider within approximately 2-5 working days from sample receipt in the laboratory.

of women get their results in 3 days

What does IONA[®] Care test for?

IONA[®] Care is a screening test which measures the likelihood that a pregnant woman is carrying a fetus with the most common trisomies: T21 (Down's syndrome); T18 (Edwards' Syndrome); T13 (Patau's Syndrome) and also:

SEX CHROMOSOME ANEUPLOIDIES (SCA)

Sex chromosome aneuploidies (SCA) occur when there are changes in the expected number of the chromosomes associated with sex determination, the X and Y chromosomes. *

AUTOSOMAL ANEUPLOIDIES (AA)

All additional trisomies (the presence of an extra chromosome) or monosomies (having a single chromosome instead of a pair)

Pregnant woman can choose to be screened for either SCAs or AAs or both.

Fetal sex determination also available as an option for singleton and monozygotic twin pregnancies.

PLEASE SPEAK TO YOUR HEALTHCARE PROVIDER FOR FURTHER INFORMATION.

*Turner's syndrome (45,X), Trisomy X (47,XXX), Klinefelter's syndrome (47,XXY) (Jacob's syndrome (47,XYY)

How accurate is **IONA***care*?

>99% SENSITIVITY & SPECIFICITY

>99% Sensitivity and Specificity for Turner's syndrome, Klinefelter's syndrome, Jacob's syndrome, Trisomy X and all additional autosomal trisomies and monosomies. For the latest performance data, please visit www.yourgene-health.com.

All high risk results should be discussed with your healthcare provider.

Why choose **IONA***care*?

Available from 10 weeks gestation

Results available within 2-5 days

High Accuracy

Minimal re-draw rate

PLEASE SPEAK TO YOUR HEALTHCARE PROVIDER TO FIND OUT IF **IONA*care* IS THE RIGHT TEST FOR YOU.**
